ADVANCED LIFE SUPPORT (ALS) 9-1-1 UNIT MINIMUM INVENTORY

I. AUTHORITY: California Health and Safety Code Division 2.5, 1797.200. California Code, Title 22, Div 9, sec 100170.a.2

II. APPLICATION:

This policy describes the standard drug and equipment inventory for an advanced life support (ALS) 9-1-1 first response unit in Orange County.

Title 8 CCR Section 5193, Blood borne Pathogens, requires sharps injury prevention/ needleless products to be utilized when appropriate.

All equipment and supplies must be latex free.

III. DEFINITIONS:

"Optional" means equipment, supplies, or pharmaceuticals that are not required in the minimum inventory, but which ALS providers are authorized to include in unit inventories.

"or" means either equipment, supply, or pharmaceutical is appropriate and effective. It does not imply that both must be stocked in inventory, rather either or both can be stocked.

IV. CRITERIA:

The number or amount of each item listed is at the discretion of the ALS provider based on a specific unit's needs for its service area. Equipment, supplies, and drug inventory that is not part of the authorized Orange County ALS Scope of Practice is not permitted without formal approval of the California EMS Authority upon request of the Orange County EMS Agency. Inventory for special ALS units (tactical, fire line, search and rescue) are defined in other OCEMS policies.

V. EQUIPMENT:

BAG-VALVE DEVICE WITH OXYGEN INLET AND RESERVOIR: Adult and Pediatric

BANDAGE SCISSORS

BACKBOARDS: Adult, X-ray transparent. Minimum of three straps

AUTOMATIC CHEST COMPRESSION DEVICE:
(Refer to Note #1 below)

U.S. Food and Drug approved with continuous hands free chest compression, portable, and battery driven.
Compression constriction band design or chest encircling band with plunger design.
Pass through defibrillator capable or design that allows for cardiac defibrillation with device in place.

LARYNGOSCOPE:
Blades: Adult - curved/straight #3 and #4 recommended
Pediatric - straight #1 and #2 (for direct laryngoscopy foreign body removal)

MAGILL FORCEPS: Adult and Pediatric; closed tip
ADVANCED LIFE SUPPORT (ALS) 9-1-1 UNIT MINIMUM INVENTORY

MONITOR / DEFIBRILLATOR: Biphasic, adjustable output, defibrillator with oscilloscope (FDA approved)  
Defibrillator-pacer pads with functional cables and connectors  
ECG pads with functional cables and connectors  
Synchronizer: designed to deliver a synchronized defibrillating pulse,  
timed to avoid the T-wave of the cardiac cycle.  
12-lead ECG capability with internal interpretation protocol to identify an  
acute myocardial infarction and ability for transmission to CVRC.  
Transcutaneous pacing module  
End-tidal CO₂ monitor with either single or continuous waveform reading output  
Recorder: Must be able to produce a paper print out of high quality.  
Batteries/Charge Units as Main Power Source

SPHYGMOMANOMETER: Assorted cuff sizes, including adult and pediatric

STETHOSCOPE: Disposable or non-disposable diaphragm type

SUCTION UNIT: Portable, with disposable canister

TOURNIQUET: Manufactured, FDA approved

TRACTION SPLINTS: Lightweight, portable: adult, pediatric (BARRIER PROTECTION ACCEPTABLE)

NOTE #1: Automatic Chest Compression Device:  
Deployed as determined by ALS provider to be immediately available to maintain continuation  
of CPR when patient is physically moved and chest compression by hand will be interrupted  
[such as loading onto gurney (stretcher) or during transport and off-loading]. Date for final  
implementation is January 1, 2020.

OPTIONAL APPROVED EQUIPMENT:

AUTOMATIC TRANSPORT VENTILATOR: Pressure or volume cycled with adjustable tidal volume and rate, audible and  
visible alarms and alerts with digital monitor screen. Battery powered (not pressure cycled from oxygen cylinder). Must be FDA approved.

BREAKAWAY FLAT: Vertically stable for full spinal immobilization

BACKBOARD: Pediatric

EXTRICATION SPLINT: Horizontal flexible, vertical rigidity; stabilizes head, neck and back

END-TIDAL CO₂ NASAL/BVM: End-tidal CO₂ nasal cannula and adapter for BVM.

RESUSCITATOR: 40 L/min maximum delivery capability, portable, lightweight, minimum 6'  
length hose to head, constant flow valve 0-15 L/min demand valve head

SLIDING (TRANSFER) FLAT

INFUSION PUMP Adjustable rate for Intravenous medication delivery at volume (milliliters) per  
minute or hour; battery operated with digital delivery readout and visual/  
audible malfunction alarms. Must be FDA approved.
VI. **SUPPLIES:**

Airway adapters: standard 15mm ID X 22mm OD both ends  
Airway, nasopharyngeal: 4.5mm - 9.0mm or adult and pediatric sizes  
Airway, oral: Adult and pediatric sizes  
Alcohol wipes  
Arm board: short, with rigid insert, padded (BARRIER PROTECTION ACCEPTABLE)  
Arm board: long, with rigid insert, padded (BARRIER PROTECTION ACCEPTABLE)  
Atomizer for nasal administration of medications

Bags (for trash)  
Basin, emesis (BARRIER PROTECTION ACCEPTABLE)  
Blanket, disposable  
Burn dressing: Clean sheet or commercial burn covering sheet

Cannulas, nasal oxygen: Adult and pediatric  
Catheter, suction: sizes #6, #10, #14,  
Cold packs, chemical (BARRIER PROTECTION ACCEPTABLE)

Combitube®: Regular and Small Adult  
AND/OR  
King® Airway: Sizes 4, 5 (size 3 optional)  
AND/OR  
Supraglottic Airway (Laryngeal Mask Airway): Sizes 4, 5 (size 3 optional)

Dressings: Kerlix or equivalent  
Gauze 4 in. x 4 in. /2 in. X 2 in.  
OP site* or equivalent, approx. 2" x 3" (for IV sites)

ET tubes: soft cuff, assorted adult sizes with stylets

Flexible intubation guide

Gloves: Assorted sizes, including clean and sterile packaged  
Glucose meter with non-expired test strips

Intraosseous (IO) needles with or without introducer device  
IV catheters, over needle type: assorted sizes  
IV tubing: Macro drip, with flow rate regulator and two medication injection sites and a "Y" adapter.

Lancet (for glucose determination)  
Lock, saline

Masks, disposable ventilation: sizes Neonate, infant, and child  
Mask, oxygen non-rebreather: adult and pediatric

Nebulizer, Acorn type, with mouthpiece and mask attachments  
Needle-ARS type for chest decompression OR Needle chest decompression kit  
Needles for IM injection, assorted sizes
Needle (sharps) disposal unit

OB kit with Bulb syringe

Pediatric length-based resuscitation tape
Personal protective equipment (OSHA compliant masks, gowns, gloves, eye shields)
Pulse oximetry device, may be incorporated within defibrillator

Razors, disposable
Restraints: Soft

Solution, sterile; NS 1000 mL (for irrigation)
Suction, tonsil tip; semi rigid or rigid, large bore (Yankauer suction tip)
Syringes, assorted sizes

Tape (paper, plastic hypoallergenic): assorted sizes and types
Tourniquets, for facilitating IV placement

Petroleum (Vaseline®) gauze

Underpads (CHUX®)/protective pads

OPTIONAL APPROVED SUPPLIES:

Band-Aids

CO₂ color-based detector – End tidal CO₂ detector attachable to endotracheal tube (colorimetric)

Dressings: Abdominal gauze
Eye pads
Hemostatic gauze

ET tube holders

Infant Transport Mattress, heated, consistent temperature not to exceed 42 degrees centigrade
Infusion Pump, portable, FDA Approved
IV tubing: Micro drip, 60 drops/mL

Mechanical chest compression device for CPR

One-way ‘flutter’ valve
Penlight/flashlight

Restraints: Hard leather restraints padded and quick release

Thermometer; temporal, otic, or oral; electronic with disposable patient contact probes
Tubing, oxygen connecting
### VII. PHARMACEUTICAL INVENTORY:

<table>
<thead>
<tr>
<th>PHARMACEUTICAL</th>
<th>PREPARATION</th>
